

# PIXIENCE CLOUD

## THE ONLINE IMAGE PROCESSING SERVICE

Complete your analysis with the help of dedicated experts, manage your analysis budget with the payment per image option, as well as access unrivaled data and illustrations.

Pixience Cloud is an online platform to propel your studies forward. You choose the level of analysis according to your needs : from data or image processing up to the end with statistical or scientific reports. Discover our services in our catalogue or ask us about our custom analysis services.

### How does it work?

Choose the analysis service from our catalogue and securely transfer your data to our server. Billing is done per image according to the volume of images. Select your options: statistical analysis, complete scientific report, etc. Then, your data will be processed and analyzed by our experts. After validation, your results will be available on our website.

### A secure online space

With Pixience Cloud, access the processing of your data safely and securely.

- Your data is transferred using a secure, encrypted connection to guarantee confidentiality.
- After analysis and processing, simply download your results from the same webpage.

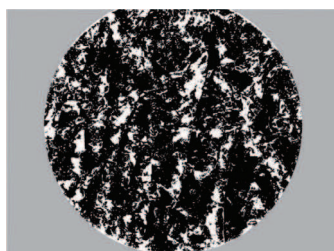

### Manage your budget & cut costs

Thanks to Pixience Cloud, you only pay for what you use. This type of per image billing lets you:

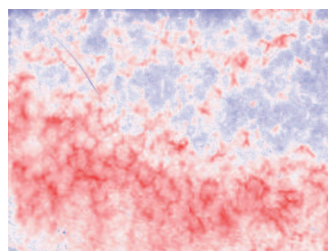

- have access to innovative algorithms for image analysis without added fees for development and maintenance.
- have access to innovative data and information without the cost of development or maintenance.

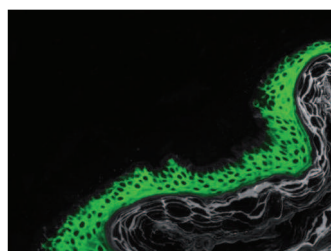

### Analysis Example

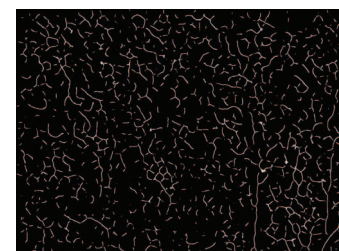

Measurement of skin dryness

Quantification of redness

Epidermis analysis in IHC

Skin Microrelief
